Data checks and limitations

Reporting period: Q1 2026. Previous-quarter participant data was not supplied, so quarter-on-quarter changes are unavailable. Participant comparisons use enrolment dates.

Program-delivery and funding comparisons require dated program and funding records, including the previous quarter.

Year Quarter	Participants Enrolled Previous Quarter	Enrolment QoQ Change	Participants Enrolled	Completion Rate Previous Quarter	Completion Rate QoQ Change pp	Completion Rate	Attendance Rate Previous Quarter	Attendance Rate QoQ Change pp	Positive Outcome Rate Previous Quarter	Positive Outcome Rate QoQ Change pp	Attendance Rate	Positive Outcome Rate

Total			**1600**			**60.0%**					**76%**	**48.0%**

Programs delivered
Review delivery volume and decide whether program capacity needs to change, considering demand and targets.

Participants enrolled
Plan cohort places, staffing and participant support based on enrolment demand.

Attendance rate
Decide where to investigate attendance barriers and improve reminders or access support.

Completion rate
Identify partners or programs that need investigation and additional completion support.

Positive outcome rate and employment rate
Positive outcome rate includes participants recorded as employed or in further study; employment rate includes employed participants only. These measures help Grad Careers review participant results and identify where further employment or study support may be needed.

Funding per partner
Review funding distribution alongside delivery volume and results before considering future allocations. Funding alone does not prove value for money.
